Abstract

Urine therapy is ancient and primitive method of alternate treatment in Tamilnadu. The treatment methods are seen in Tamil literature. The author analyze testimonials that were published in websites related to the key word searches 'auto urine therapy', 'self urine therapy' and 'urine therapy'. She has taken testimonials from cancer patients and analysed them. 10 testimonials (Cases) were taken and are analyzed and the common characteristics are listed them. Even though there were more than 100 testimonials were collected yet for the research point of you 10 cases were selected using strategic sampling method. The results show that they had used no other medicine expect_their own urine as medicine. The cure ranges from one month to three months. The seriousness of the cancer ranged from stage one to stage four. The faiths of the patients were remarkable. All report complete cure, which was proved by the medical test.

Key words

Cancer, auto urine therapy, alternate medicine, Tamil literature, testimonials, review of literature

Introduction

Urine therapy is ancient and primitive method of alternate treatment in Asia. The treatment methods are seen in Tamil and Chinese literatures. It is called auto urine therapy or self urine therapy or as urotherapy. American cancer society has recommended this urine therapy for the treatment of cancer. It is highly valued medicine for protecting one from cancer. Human urine has many healing and strengthening factors. The enabling factor helps to enhance collagen which is useful in healing of wounds and skin care. There is literature evidence

from many testimonials that there is a cure of cancer. Urine therapy is one of the effective ways of treating cancer from stage 1 to stage 4. It is used by indigenous Americans and ancient Egyptians 1. The urine is named as Amoroli, shivambu, amirtham in Tamil literature. Ancient literature speaks of mothers in Tamil culture that they had fed the children with Amoroli (Urine) and mother's milk which increased their immune system.

Background of the problem

Economically backward cases find it difficult to meet the medical cost of treatment of cancer when it comes to quality treatment which cost their welfare. The alternate methods come on the way to help them. There are many success stories which are not documented scientifically in medical journals. The practitioners are not trained in popular way of assessing the diseases or its improvement. People find it difficult to trust the native practitioners as the allopathic medicine had gained popularity and it has its diagnosis elaborate. So the author analyses the testimonials and its success stories considering them as cases.

Summary of the Cases

Case 1

I am regularly taking morning's first urine and this gives me a lot of energy and spirit. I request all patients to take their urine because this is directly connected with our soul. I will also like to share with readers that urine has restricted my cancer disease to spread because in-spite of remarkable delay in diagnosis, my disease still was on the first stage. Thanks, Rakesh Mehta, Jodhpur

Case 2

MOUTH / CHEEK CANCER: Many thanks for your mail received on 4th June. I practiced urine therapy by swirling urine in my mouth, by drinking urine and also massaging on body. Miraculous changes have happened. My left cheek was sinking in due to fat and collagen loss (due to mouth cancer). This cheek has already become 50%

normal. I mean sinking of cheek is much less now. Also inside of mouth feels much better now. The only thing I did not do was keeping wet urine packs on cheeks and stomach and I did not do urine fasting. But now I will do all of this also. I have now gained confidence as I can see signs of cure. I am only 18 and I thought my life was over because mouth cancer is mostly fatal. Even if one survives after surgery, one has to live with deep scars on face for life. I will not be going for any surgery, chemo or radiation now. I really don't know how to thank you for saving my life and saving me from face disfigurement by surgery. Please accept my heartfelt thanks for the great job you are doing for the humanity.

Shivani Sharma

Case 3

CML LEUKEMIA (CANCER) : Things have been improving at a pretty fast pace. My WBC dropped from 265,000 to 219,000 one month later and then three weeks after that it dropped to 151,000. I plan on getting another blood test on Tuesday and I expect it to be down even further. I am beyond grateful for this, I feel like I am recovering for the first time since this whole ordeal started. Thank you very much. I fully intend on coming off the medication completely eventually. From all the information I've seen it seems that urine therapy is a panacea. Jason Clark, FC Richmond, KY, United States

Case 4

URINE THERAPY IT REALLY WORKS! I washed my body with my urine using a flannel and to my amazement the itching stopped, the rash, sores, puss, everything went back to normal, my skin became cleaner, clearer and smoother than it's ever been. Our urine contains chemical elements that heals the body. It can be used on the skin or swallowed and would help fight skin cancer and all other skin and internal infections and diseases. Angela Brown- Independent Researcher, angelabrown007an@aol.co.uk

Case 5

My 62 year old uncle was diagnosed cancer of the stomach with liver metastasis 4th stage. He was booked for surgery to remove stomach, I advised him to drink every drop of urine he produced and he did. He had surgery on the 4th week and surgeon told him his liver had recovered and he is doing well now on chemo and still continues wt urine. Another aunty had multiple uterine fibroids booked for surgery to remove uterus told her about UT in December 2012 and was booked for July 2013. When she went for admission the gynecologist cancelled her surgery saying she does not need surgery after examining her doing a scan on her there is many more let organize them, do more interviews and send. Case 6

"It took just 36 hours for a lump to appear at the side of my neck. I'd had no prior warning. This was my warning that my body was harbouring a second cancer."

In late February 2008 one of his doctors (not his usual GP or his haematologist) with whom he had been consulting since 2004 in relation to his prostate cancer, recommended urine therapy, saying that while she was unaware of any scientific evidence to support its success, anecdotally she had known it to have been successful in the treatment of lymphoma. The recommended regime was to drink 250mls of the first urination of the day after voiding a small amount to clear the urinary tract. John decided immediately to give this therapy a try. He tells us:

"As my doctor was describing this therapy to me I decided then and there I would go with it. I started the next day and rarely missed a day over the next four years." Because of his belief in the powerful healing connection I find between the mind and the body.

Case 7

I had remembered one of my mum's friends from years back telling us he had been badly burnt all over his face, and used his own urine to heal himself, he had no scars at all, and beautiful skin for a 65 year old man. Just to give you an idea of what my body was going through, (sorry if it puts you off!) my urine was completely yellowy-white and thick, almost like milk (puss), there was still blood in it. So I bravely started drinking the stinky mid-stream urine, every time I went to the bathroom. The morning after I started my urine was slightly translucent for the first time, and after three days, my urine looked normal, and the pain was less than half what it was before. After three weeks I was healed in my opinion! There were little twinges for the next year or so, but today when I have an ultra sound or x-ray on my kidneys they show no damage at all, which the doctors find amazing. <http://www.shirleyswellnesscafe.com/Testimonials/Urine-Testimonials>

Case 8

Gracie Adams –

When I was about 20 years old had severe case of strep throat, had taken doctor's medicine for a week. My throat was closing up. My mom told me of this old remedy, urine therapy from back in the day. So she told me to use my urine, gargle and swallow some as well as to get infection that was deep beyond my throat area .I did what she said. I feel if I hadn't use this remedy I would be dead. I drank a small amount of urine that afternoon, I couldn't wait till the next morning.....So the next morning about 5am, I took another dose (midstream) and had it in a veg juice (I have always had my UT with a Veg Juice , after taking it I went back to bed a slept like the dead. I did this for several days, and then my symptoms returned. I took it 5 times a day, as I was hardly eating just a little food. I got through it and my symptoms eased. I found making a poultice out of urine and paper, it would mould around my

fingers which were really sore so i could get some relief at night to sleep, after a week or so I no longer had to do this.....also I slept really well as I found out urine is great for insomnia.....over the next few months things really improved. <http://www.shirleyswellnesscafe.com/Testimonials/Urine-Testimonials>

Analysis

The following table shows the details of the case *
Refer to Table I page 47

Among the eight cases six cases have taken urine fasting as their initial treatment before they go for the AUT treatment. It is believed that the treatment becomes effective when they start with the Urine Fasting. Seven out of eight cases are cancer cured cases, reported recovered after the AUT treatment. Even though Massage and Drinking Urine is suggested mere drinking had helped patients recover from cancer. Patients who had taken three weeks is sufficiently enough to cure the cancer to certain extent. The cases include Mouth / cheek cancer, Leukaemia, skin cancer, stomach and liver cancer, Cancer of the skin, Kidney dysfunction and Throat cancer. Irrespective of the stage the patients enter into treatment and see the corresponding level of recovery.

Conclusion

Most of the scientific cancer reports concentrate on urine extracts of anti-cancer agents.¹ The most amazing aspect of urine therapy is its urine contains antibodies and immune stimulating factors against all viruses. The researchers stated that even minute amounts of antibodies, sometimes so low that they cannot be detected with conventional methods, are effective in preventing and treating diseases. There are reports investigating and describing the curative effects of urine therapy on a wide range of infectious, fungal and viral infections.² Urine Rejuvenates³ Urotherapy is reported to be beneficial for the treatment of cancer⁴

Table I

Case no.	Treatment details	Frequency treatment	Disease	Duration	Place	Outcome	Drink/massage
Case 1	1-0-0	1-0-0	Cancer		Rakesh Mehta, jodhpur	Recovered	Drink
Case 2	1-0-0	1-0-1	Mouth / cheek		Shivani sharma	Recovering	Drink + Massage
Case 3	1-0-0	1-0-0	Leukemia	3 weeks	FC Richmond, KY, United States	recovering	Drink
Case 4	1-0-1	1-0-1	skin cancer	3 weeks	Angela Brown- angelabrown007a n@aol.co.uk	recovering	Drink
Case 5	1-0-0	Urine fasting	stomach and liver cancer	4 weeks	Stampana Osenotse, Botswana stampana@gmail. com	recovered	Drink
Case 6	Urine fasting	All the urine output	Cancer of the skin	11 months	http://urinetherapy .info/johns-story/	Recovered fully	Drink and massage
Case 7	Urine fasting	All the urine	Kidney dysfunction	3 weeks	http://www.shirley s-wellness- cafe.com/ Testimonials/Urin e-Testimonials	Recovered fully	Drink massage
Case 8	Urine fasting	All the ruined	Throat cancer	3 weeks	http://www.shirley s-wellness- cafe.com/ Testimonials/Urin e-Testimonials	Recovered fully	Drink and massage

The American Cancer Society recommends urine therapy for the treatment of cancer ⁵ One of the important uses of human urine is for treatment of burns and wounds. It is believed traditionally in India that applying urine over the wound increases healing ⁶. So in authors opinion the AUT is the possible solution when the diet of the patient is regulated for cancer. The testimonials prove very strong evidence of cure and recovery of cancer of all types and all stages.
